Wildlife Biologist

Science Communicator | Conservation Educator

WILDLIFE CONSERVATION PORTFOLIO

ABOUT ME

I am a **wildlife biologist** from Argentina with a strong foundation in biodiversity, scientific research and conservation. Throughout my career, I have combined laboratory research, fieldwork and environmental education to support wildlife conservation and promote science communication.

I enjoy working both in **research** and in the **field**, contributing to **ethical conservation** projects while helping organisations communicate their impact through **education** and **visual storytelling**.

- **Scientific Research**
- **Field Experience**
- **Wildlife Conservation**
- **Science Communication**

> *I believe effective conservation begins with science, grows through collaboration, and reaches people through education and communication.*

ACADEMIC BACKGROUND

Bachelor's Degree in Biodiversity

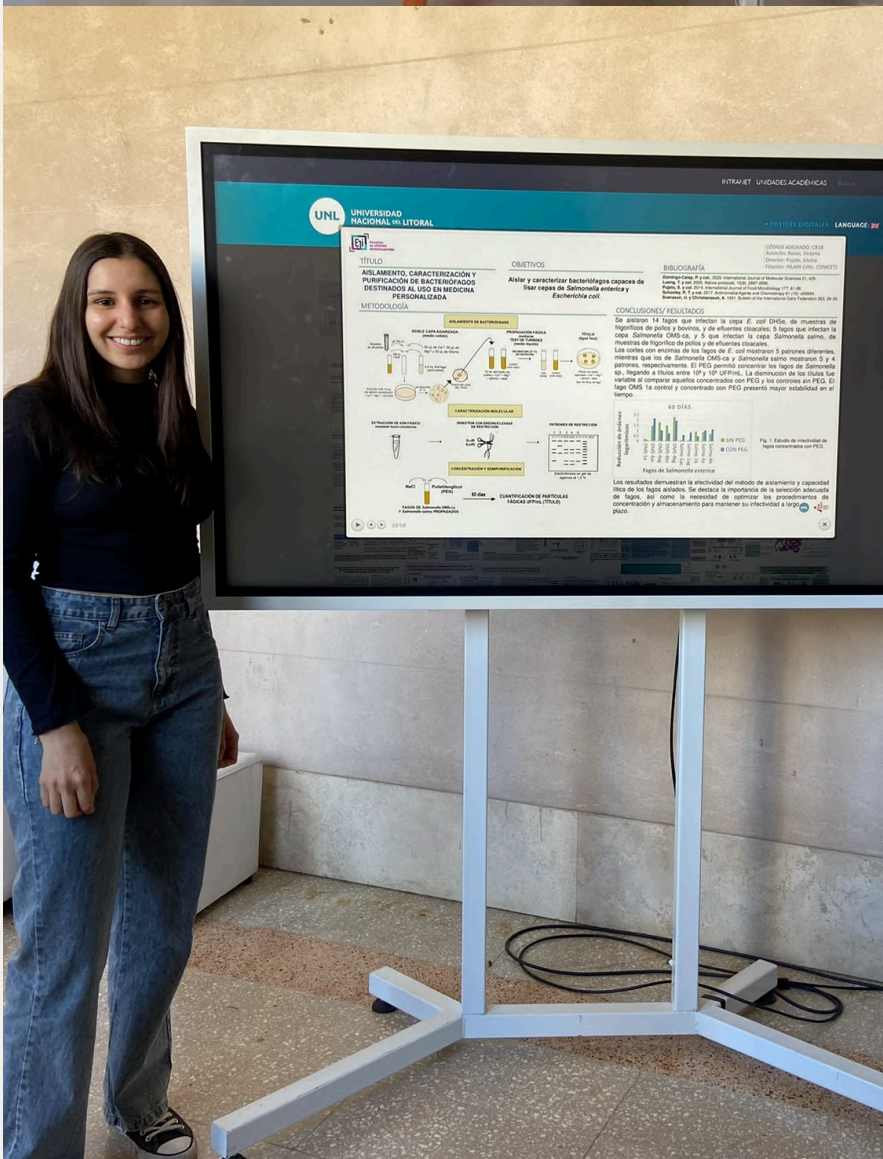

National University of the Litoral (UNL)
Santa Fe, Argentina

My academic training provided a strong foundation in biodiversity, ecology, genetics, microbiology and conservation biology. Throughout my degree, I combined laboratory work, field research and international academic experiences that prepared me for scientific research and wildlife conservation.

- **Ecology & Conservation Biology**
- **Zoology**
- **Genetics**
- **Molecular Biology**
- **Microbiology**
- **Environmental Sciences**

Academic Exchange Program
Autonomous University of Quintana Roo
Mexico

RESEARCH EXPERIENCE

My research experience combines **microbiology, molecular biology** and **environmental genetics** to understand and protect biodiversity.

INLAIN – CONICET

Microbiology Research

- Isolation, characterization and purification of bacteriophages.
- Microbiology and virology research.
- Molecular biology techniques: DNA extraction, restriction enzyme analysis, PEG precipitation, lyophilization.
- Microbiology and titration assays (double agar layer, turbidity tests, MOI assays).
- Biosafety level practices and laboratory protocols.
- Data analysis and interpretation of results.

GENETICS LABORATORY

Environmental DNA Research

- Environmental DNA (eDNA) extraction from water and soil samples.
- DNA metabarcoding for biodiversity monitoring.
- Molecular ecology techniques and bioinformatics analysis.
- Contribution to biodiversity assessment and ecological research.

TEACHING INTERNSHIP – GENETICS

Undergraduate Laboratory

- Assisted in genetics practical sessions for undergraduate students.
- Laboratory demonstrations and guidance in experimental techniques.
- Student mentoring and academic support.

SCIENTIFIC PUBLICATION

Co-author of a peer-reviewed scientific publication on environmental DNA (eDNA) and DNA metabarcoding for biodiversity research.

FIELD RESEARCH EXPERIENCE

Hands-on experience in **wildlife monitoring**, aquatic ecosystems, **field sampling** and **biodiversity research** across multiple **conservation** projects.

FIELD ACTIVITIES

- Aquatic ecosystem **monitoring**
- Wildlife **capture** and **handling**
- Water and sediment **sampling**
- **Population** monitoring
- **Nest surveys** and **hatchling** monitoring
- Small mammal **morphometrics**
- Species **identification**
- Environmental **data collection**
- Biodiversity **field surveys**

WILDLIFE CONSERVATION EXPERIENCE

During my conservation placement at SANCCOB (Southern African Foundation for the Conservation of Coastal Birds), I participated in the **rehabilitation** and **daily care** of **endangered African penguins** and other seabirds. Working **alongside** veterinarians and rehabilitation staff, I gained practical experience in **wildlife handling**, **health monitoring**, **husbandry**, and **conservation** protocols.

The experience combined animal **welfare**, **rehabilitation**, and **environmental conservation** while following strict **biosecurity** and ethical handling procedures.

RESPONSIBILITIES

- Safe handling and restraint of **African penguins**
- Physical **examination** and **health monitoring**
- Feeding preparation and **nutritional support**
- Assisted release of **rehabilitated birds**
- **Husbandry** and enclosure maintenance
- Beach **conservation** and waste removal
- **Teamwork** with wildlife rehabilitation staff
- Animal **welfare** and **biosecurity** procedures

SANCCOB™
saves seabirds

SANCCOB

Wildlife Rehabilitation Volunteer

Cape Town, South Africa

WILDLIFE CONSERVATION EXPERIENCE at HESC

I had the incredible opportunity to volunteer at the Hoedspruit Endangered Species Centre (HESC), a leading conservation organization dedicated to the protection of Africa's iconic wildlife.

During my placement, I actively contributed to the **rhino** and **cheetah conservation programs**, as well as the care and wellbeing of the many other species at the centre.

I supported the team with daily activities, animal husbandry, habitat maintenance, enrichment, and general operations to ensure the best standard of care for the animals.

A highlight of the experience was attending an exclusive educational session with world-renowned wildlife veterinarian **Dr. Peter Rogers**, learning directly from his extensive knowledge and experience.

I also had the privilege of joining both day and night safaris / game drives, exploring and learning about the bush, its ecosystems and the incredible wildlife it supports.

ACTIVITIES & LEARNINGS

- Rhino conservation program (monitoring, enrichment, care)
- Cheetah conservation program (feeding, habitat enrichment, monitoring)
- Care of other species at the centre
- Daily animal husbandry and enclosure maintenance
- Habitat enrichment and cleaning
- Educational session with Dr. Peter Rogers
- Day and night safaris / game drives
- Learning about ecology, tracking and wildlife behavior
- Teamwork and collaboration with amazing staff and volunteers

COMMUNITY VOLUNTEER EXPERIENCE

at NOURISH ECO VILLAGE (SHIK SHACK)

Nourish Eco Village (Shik Shack) is a sustainable community project in the heart of nature, dedicated to education, creativity, self-sufficiency and uplifting local children and families.

During my stay, I had the opportunity to volunteer in various daily activites that help keep the village running and make a positive impact on the community.

It was an inspiring experience of connection, learning, and sharing skills while contributing to a meaningful purpose.

ACTIVITIES & CONTRIBUTIONS

- Helping in the organic garden and harvesting fresh vegetables
- Sorting, cleaning and organizing produce
- Creating bracelets and crafts using recycled magazines and other reused materials
- Teaching and supporting children through educational activities
- Playing games and spending quality time with the kids
- Helping with arts, drawing, painting and creative projects
- Organizing and tidying the library and learning resources
- Organizing and displaying children's artwork and school projects
- Supporting daily tasks around the village, wherever help was needed
- Being part of a positive, inspiring community and learning from it every day

NOURISH

WILDLIFE CONSERVATION EXPERIENCE

at DAKTARI BUSH SCHOOL & WILDLIFE ORPHANAGE

Daktari Bush School & Wildlife Orphanage is a conservation initiative in the heart of the African bush, dedicated to wildlife rehabilitation, conservation education and community empowerment.

During my stay, I volunteered as part of the team, contributing to animal care, environmental education and community outreach programs that make a real difference for both wildlife and local children.

It was an unforgettable experience of learning, connection and purpose, surrounded by incredible people, animals and the beauty of the bush.

ACTIVITIES & RESPONSIBILITIES

- Animal care: feeding and cleaning enclosures twice a day
- Monitoring the health and wellbeing of the animals
- Habitat cleaning and maintenance
- Preparing enrichment for the animals
- Assisting with general daily operations of the center
- Environmental education classes with visiting school groups
- Teaching children about wildlife conservation, ecosystems and the importance of protecting our environment
- Life skills education with local children: safe sex, manners, boundaries and consent, substance abuse awareness and healthy lifestyle choices
- Organizing interactive games and activities to make learning fun and meaningful
- Helping create a safe, respectful and empowering space for all the children
- Teamwork, communication and collaboration with staff and other volunteers
- Supporting fundraising and awareness initiatives when needed

CONSERVATION COLLABORATIONS

Wildlife Conservation Project

Botlierskop Private Game Reserve

South Africa · In collaboration with Nicolás Marín Benítez, National Geographic Explorer & UN Ambassador

As part of my work with MANTIS, I participated in a wildlife conservation experience at Botlierskop Private Game Reserve, collaborating with photographer, National Geographic Explorer and UN Ambassador Nicolás Marín Benítez.

During the project, I took part in the veterinary intervention of an African buffalo, gaining first-hand experience in wildlife management and conservation practices within a private reserve.

The experience also involved audiovisual documentation and communication, contributing to MANTIS' work connecting conservation, wildlife experiences and storytelling.

MY CONTRIBUTION

- Participation in a wildlife veterinary intervention
- Conservation and wildlife communication
- Audiovisual content creation
- Documentation of conservation practices
- Collaboration with professionals and private wildlife reserves

Wildlife management & veterinary intervention

SCIENCE & CONSERVATION COMMUNICATION

BUILDING A COMMUNITY AROUND WILDLIFE, CONSERVATION & VOLUNTEERING

INSTAGRAM

17.1K followers

1.9M profile views in the last 30 days

+16K followers gained in 3 months

Through my Instagram account, I share wildlife, conservation and volunteering experiences, combining my background as a biologist with accessible and engaging content.
